Thanks Kalle, I'll check it out closer to 2pm and then let you know what I find. Hopefully the tide will show something by then. If it looks like it is a serious problem, I will connect with Anchor and make arrangements to meet them on site.
Kathy Parker, USEPA R10

Hi Kathy,

Attached are the last two inspection reports that were conducted out at the site. The inspections were completed closer to high tide. The last inspection was conducted on February 4, 2011.

Anchor, and Aspect plan to be on site at 4:30pm today to meet with you.

Thank you,

Kalle Kuether Godel

Thanks Danielle. It looks like there is a low tide at 430pm today. I'll go out this afternoon and take a look at the area of the beach where the pictures show staining and also look for sheen. I'll call you when I know more.

Hi Kathy!

Thanks for taking a look at this. These are the pictures we received of the site.

MST1,

Please contact EPA and schedule a joint assessment of the Bremerton site and put it IMD calendar.

Chief,

Below are the photos I took of the MGP CERCLA site in Bremerton. The stained area deserves a follow up and coordination with EPA. Please back brief when I get back. - LCDR Gough
